THE SHORTAGE OF FOOD

Alarming reports of decreased food production due to scarcity of farm abor have been made by Senators and members of the House who have recently returned to the capital city.

Senator Ellison D Smith, of South Carolina, just back from a trip through the South, predicts that the country will soon be face to face with the most serious food famine in history. Thousands and thousands of acres hitherto given over to the production of foodstuffs are lying idle and unfurrowed in the States he visited.

Similar reports have been made by Senator Capper, of Kansas, and Serators from others of the great food producing States.

Senator Smith declares that while was only 84 per cent of the normal, this year it is only 72 per centi of pormal, and is of an age and character which are not conducive to the highest productivity.

The only remedy in Senator Smith's opinion, is for the manufacturers of articles hot classed as necessities to suspend operation for a time and perimit the labor to go back to the farms.

The Baltimore Sun in a suggestive picture, in which an unnumbered multitude has congregated ready to devour five loaves and two fishes in possession of a child, places the following under the cut:

And it came to pass that the multitude coming upon the hour of meal time began to take stock of themselves whereof they might eat. And those among them who did work by the sweat of their brow to produce the essentials of existenc were as seven, and those who cared not a whoop for production, neither did they toil to the end that they might eat but that they might "get by with it" were as seventy times seven. Now therefore it cam about that there was found among all the multitude but five loaves and two fishes with which to feed them. Which without the assistance of a miracle is nowhere near enoughence the tumult."

The Romans of old, at times, found themselves face to face with condiditions which now confront us. Farmers were exempt from taxes cr military service when they agreed to remain in the rural districts and labor for increased production of life's essentials.

DRIVE AGAINST LOAFING

A drive against loafing has been inal gurated by the sheriff of Leon County, Florida, who has just caused the posting of placards throughout his jurisdiction warning unemployed to accept employment or suffer arrest and prosecution under the vagrancy laws. The demand for labor is heavy and a vigorous drive against loafing will be enforced.

The Fredericksburg Ledger fifty years ago called attention to the fact that some forty or fifty young men of that town who were out of employment signed up to work on the Alabama and Chattanooga Railroad at \$1.75 per day.

The young men referred to were probably members of what had been regarded as well to do families before the civil war. They had returned to their homes after having served in Confederate army to find blackened walls. Fortunes had been swept away during the four years' conflict, and they wanted employment. These neite sons of the Old Dominion did not adopt Mr. Micawber's tactics-
